

ACD15 Trailer

Base, Line Maintenance &
Ground Handling Equipment

Ground Handling Equipment

Reliable easy to use low maintenance equipment
for efficient ramp operations.

Key features

- Suitable for LD1, LD2, LD3 & LD3-46 ULD's.
- Capacity 1600kg.
- 360 degree rotary platform with auto lock every 90 degrees. Lock released by foot pedal either side.
- Two rows of heavy duty rollers with centre walkway.
- Side guide incorporating vertical restraint roll and roll over stops at each end.
- Manually operated intermediate LD2 stop.

ACD15 Trailer

Part of a range of robust, reliable, high capacity ramp container and pallet dollies. Compliant to IATA and European CE Standards and specifically designed for arduous service over many years on busy airport ramps.

The ACD15 Container Dolly comes equipped with a 360 degree rotating platform with auto-lock at every 90 degrees. The lock is released by a foot pedal at either side. This dolly also features two rows of rollers with a central walkway. Continuous guide-rails at each side incorporate the vertical restraint for the containers' tapered lead at each end. It also features "roll-over" end stops, depressed by the container and automatically raising behind the container, they are lowered by manually operated levers at opposite ends of the rotating platform.

These dollies are fitted with Ackerman steering on the front wheels, and a highly effective yet simple to maintain tow bar activated parking break. This is engaged when the tow bar is raised and latched or lowered to the ground. A foot pedal releases the latch and the brakes are released when the tow bar is in the towing height.

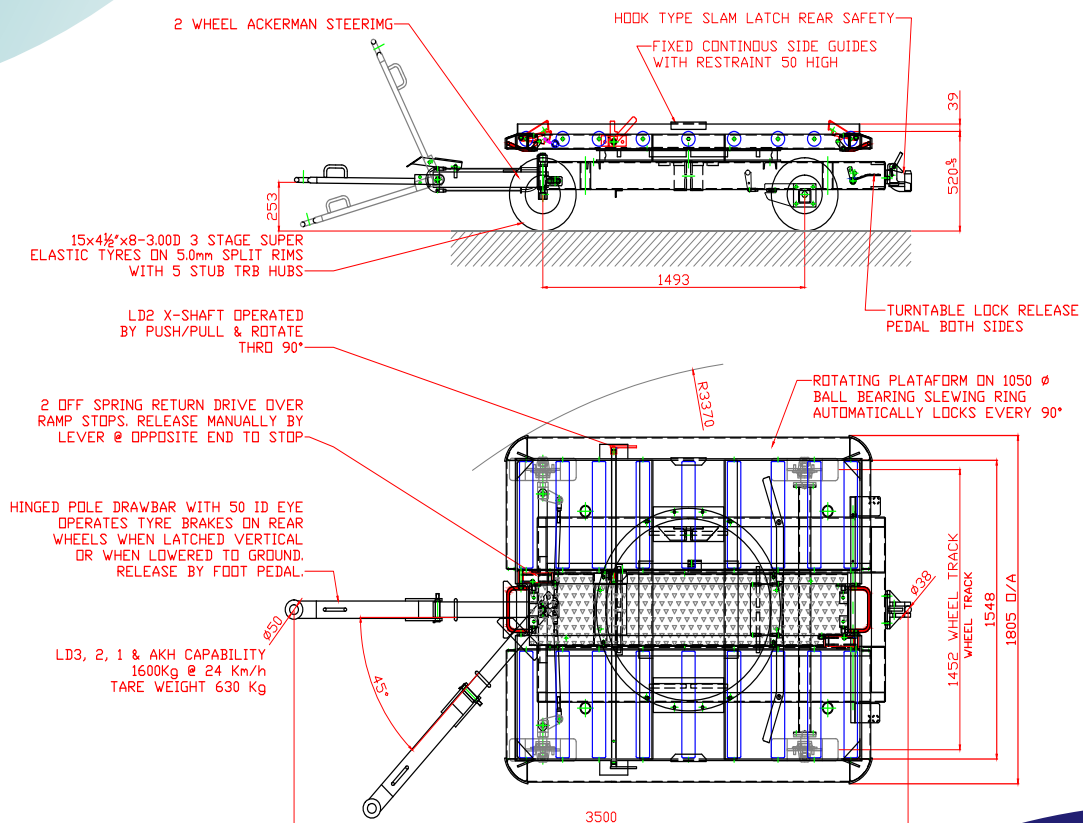

All trailers are galvanised with hi-vis markings and fitted as standard with 75mm forged steel tow eyes, a forged steel safety hook with automatic spring-latch rear hitch. Alternative hitches, tow eyes and wheel hitches are available.

ACD15 Trailer

Product code:
3100-020-00-00
