

ACD70SD Trailer

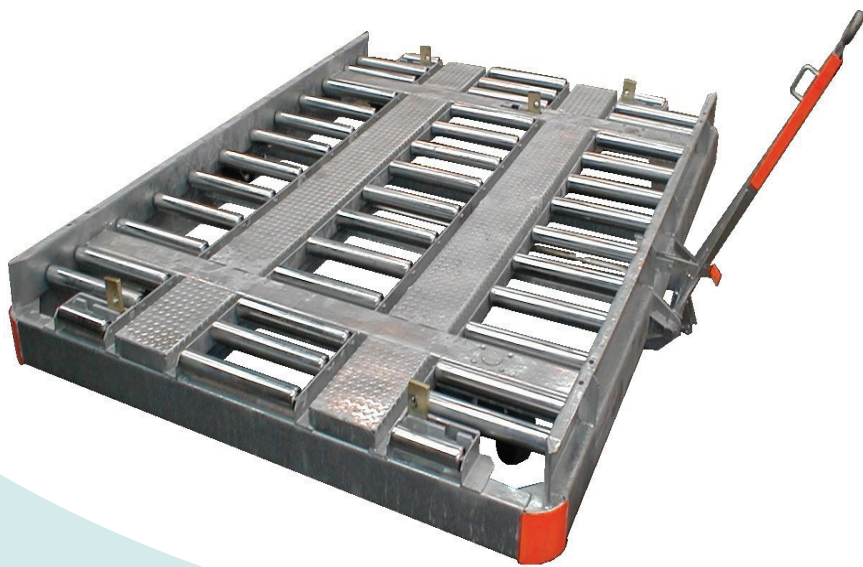

Base, Line Maintenance &
Ground Handling Equipment

Ground Handling Equipment

Reliable easy to use low maintenance equipment
for efficient ramp operations.

Key features

- Wide side towed pallet dolly can be loaded from either side and will accommodate 125 x 96, 125 x 88 and 108 x 88 pallets.
- Capacity 7000kg.
- Conveying surface is 3 rows of 75mm heavy duty rollers with two walkways. Heavy duty lift up stops are fitted to suit specific ULD Sizes.
- Heavy duty castor steering.
- 76mm eye and heavy duty E-Type rear hitch with 33mm pin as standard.

ACD70SD Trailer

Part of a range of robust, reliable, high capacity ramp container and pallet dollies. Compliant to IATA and European CE Standards and specifically designed for arduous service over many years on busy airport ramps.

The ACD70SD is constructed from folded high tensile steel sections. The surround frame has reinforced and rounded corners, designed to minimise collision damage.

The conveying surface is equipped with 3 rows of 75mm diameter heavy duty rollers with sealed bearings, running on hexagonal double spring loaded axles. Heavy duty lift up stops to retain the desired ULD sizes, are fitted as standard.

The running gear consists of two twin wheeled swivelling castors at the front with 50mm diameter king pin and offset hub with heavy duty taper roller bearings. Two twin wheeled fixed units are fitted to the rear of the dolly. The standard wheels are 15 x 4.5-8 D5 3 stage super elastic solid rubber tyres on split rims.

All trailers are galvanised with hi-vis markings and fitted with 50mm or 75mm steel tow bar eyes, depending on the size and specification, an E-type spring loaded rear hitch with 25mm or 33mm pin. Alternative tow eyes, hitches, wheels and tyres are available. Anti slip walkways are provided to suit the deck configuration of each type.

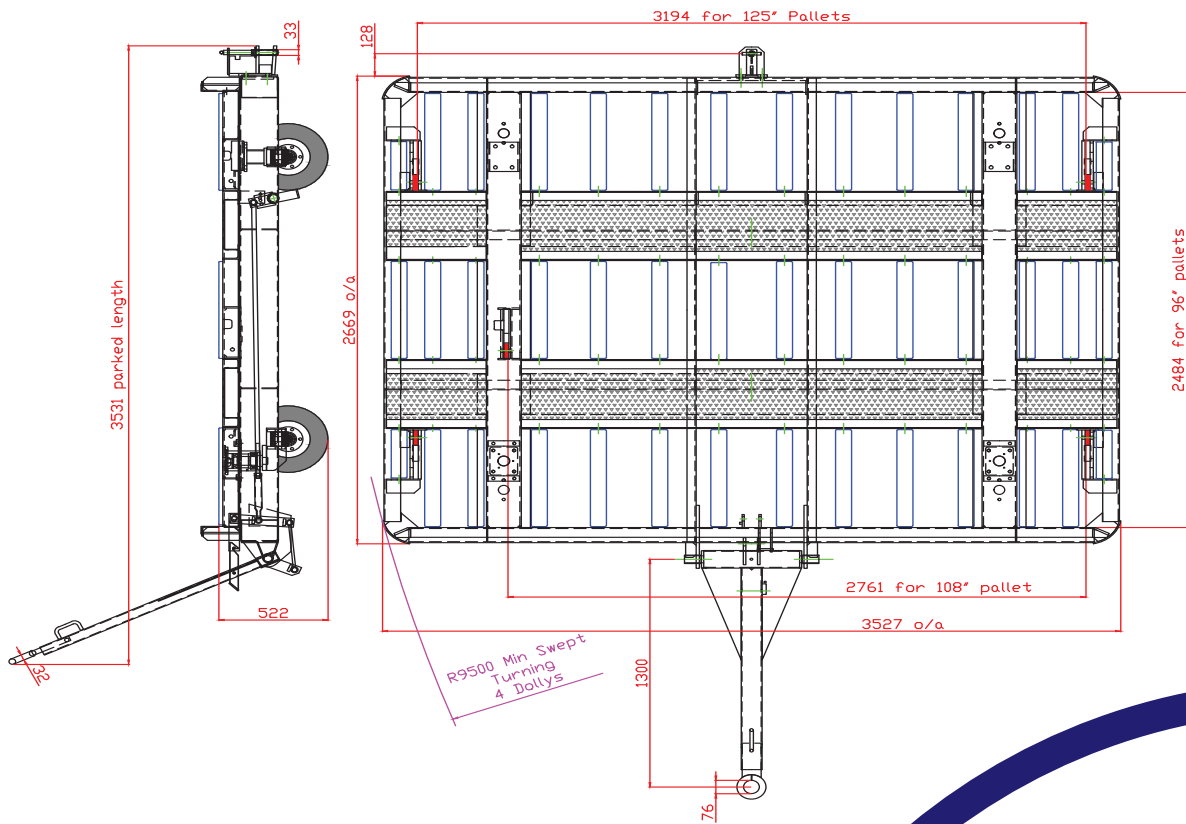

ACD70SD Trailer
